What's New in the Photoshop EXpress?

Q: Notepad++ - How to add a new entry to a list of files? I'm not familiar with Notepad++ but want to add some entries to a list of files. I can choose them in the "Load" window. The question is what do I enter to add a new entry to a list? Is there an option like some "Add next to first" functionality? A: As comments already mentioned, I would suggest using a simple text editor that supports user defined lists (e.g. Notepad++, TextPad,...) To define and list or edit the entries in the list, find a way to create a user-defined list. I for example suggest the following way (found here): Open Notepad++, and select "File > New List". Create a new list After opening the "List options" dialog, Click on the plus sign on the right side of the list name Double-click on a row to change it In the "List contents" section, Select the list tab Click on the Add button to define the item You may further edit the item settings in the "Options dialog" Alternatively, Notepad++ has a user-defined list There, you can define the list and edit the entries. To add an item to the list, select the list tab, and type some text in the "Add text" field: You may also add and remove items by clicking on the "Add" and "Remove" buttons. To add an item, simply click on the "Add text" field and type some text, press enter to add an item at the current position and double click on an item to change it: I don't know how you can add a new entry to an existing list - it seems that you cannot do that.
