gamesQ: Going through a for  
loop in which each variable is a  
filename and using that

filename as an input to another  
loop I am new to python and I

---

have a new CS course to help me with my logic and programming. My problem is below but I am unsure how to approach the problem. My objective is to create three variables which start with "X". These are: X1, X2, and X3. Then I would like to go through a for loop in which each variable is a filename. Then I would like to use each filename

---

input as an input for the second for loop. My problem is I am not sure how to do this because my previous attempts did not work. Output should look like this: X1 1 2 3 4 X2 1 3 2 4 X3 1 2 3 4 Here is my attempt:

```
import string
for i in string.letters: X1 = i
for i in string.letters: X2 = i
for i in string.letters: X3 = i
```

This is how far I got with the

---

assignment: import string for i  
in string.letters: X1 = i for i in  
string.letters: X2 = i for i in  
string.letters: X3 = i A: You  
can just make a list of  
filenames to read from, and  
then use a list comprehension  
and str.strip to separate the  
individual values
