Intralism is a hard rhythm game where your success lies in your ear for music. Listen to music, match arcs to the beat and press on the right button to destroy the circles. Try to match as many circles as you can while maintaining the perfect rhythm. Do you have what it takes to be better than others? Play Intralism and become a rhythm master. All right, it looks like I haven't managed to write a proper description. Let's just say that Intralism is a hard rhythm game where your success lies in your ear for music and that you play it like crazy. So here you have it. If you played the original and if you never played a musical Intralism before, then you should give this game a chance to impress you.

The days of budget blueprints and leaked PowerPoint slides are all but a distant memory for the budget process in Canberra. There are two key changes to the Budget consolidation process. The first is that the adoption of the budget process, now it's no longer just a secret done in the dead of night in the Treasury. What has changed is the time of day at which the Parliament is sitting, and the timing of the budget. At the moment, the budget is usually delivered in February or March. But the budget isn't delivered that far into the year. Instead, it is delivered in late July or August, so there is still four months between the mid-February delivery and the end of the year. Parliament goes quiet, and that means no more "blue on black" budgets. The other change is that budget consolidation is done in public. Instead of being locked away, with Treasurer Scott Morrison, in a back room, the budget process has become a dog and pony show. Treasurer Scott Morrison and Finance Minister Mathias Cormann outline the budget in Parliament. (ABC News: Matt Roberts) Treasurer Scott Morrison, Finance Minister Mathias Cormann and a host of others, including the Prime Minister, present the budget in a public forum. There is a live television audience and the budget announcement is made in Question Time. There is also a degree of social media. The budget is also available for anyone with a smart phone to pull it down. Budgets become "event announcements" But the budget is more than a scheduled 'event announcement'. Rather it is a social media market

What's new in Magic Balls:

Thursday, January 31, 2015 Once again, Meg Russell takes us to a hidden gem of a battlefield, an abandoned emergency room from the 1800's. Imagine your life is your own and there's nothing in this world quite like your story. A description of the book that fits you best, and reminds you of your inner optimist. When it happens to you, there's never a dull moment because you are living out your own story of life. Then imagine for a moment that for the rest of us, our life is not our own, but a fable, a story we're told to learn. Our story is plotted out for us so we can be sure that we learn our lesson and then move on to the next plot twist to be told. Medical mental health care has the same flavor as those Hollywood films where the hero never thinks for herself. We are living out a script and this is one of those beginnings of our story. *The ER: Patient Typhon* by Meg Russell unravels the history of psychiatric conventions and practices. Honestly, I was taken aback. It is not very common for history to talk about patients in such a candid fashion. The more interesting thing to me is how medical practices change so drastically from one era to another. Mental health has always existed on the fringe of medical practice. It might be interesting to learn the history of things like syphilis in medicine. The American pharmaceutical industry has always been at odds with mental health. I guess in our imagination, mental health is off-brand treatment of little old ladies who grow incredible, curly beards and become dangerous predators out to get children. The inclusion of mental health in the American hospital is a recent addition, and is almost like putting a bottle of aspirin next to your toothbrush at the end of a shower. There is a certain uncomfortable, dueling culture between the addicts with their plastic bottles and syringes and the people who think they're geniuses with their pens and scripts. Meg Russell takes us from the days of the wide

gangrenous wound with death just around the corner, to an era of polyclinic, sleep pills, and mesmerist movement. Even though this story is in the distant past, many of our contemporary problems are still being treated the same way. This is not to say that a single answer will not be found to some of our problems. Instead, it's the way our society, our bureaucracies

"Redout" is a thrilling first-person 3D action and adventure game, released for the PC, iOS and Mac in 2012. It's a departure from the action/puzzle genre. In "Redout", you are your only weapon: you run, jump and fight your way through the levels to escape the demons that are trying to rip you apart. You run and jump across the rooftops, slashing them away and smashing down windows and security shutters with your two weapons at your disposal - your fists and your feet. Upbeat, fast-paced and incredibly exciting, you are forced to rely on your agility, bravery and quick thinking to survive and flee the demons that are chasing you. You are Vincent Redout, a young yet driven man of 23, student of architecture, enjoying his life in Paris. Yet fate has chosen you to save the life of your sister, who is suffering from a mysterious illness and needs your help. When you receive a phone call from your sister, desperate for your help, you leave everything behind and leave for the gates of hell. But, what awaits you inside is not what you could have imagined... This new version of Redout includes many upgrades and, of course, support for the NVIDIA SHIELD and SHIELD Tablet devices, combining the gameplay with a 3D stereoscopic viewing experience, as well as new touch controls that allow players to swipe, move and throw punches.
