The little one is so exited for this day that we might even get a few stories out of her! I said earlier about having a spooky Halloween party for kids. As much as we'd like to, we are not going to do that as I am not a fan of the "halloween kids tricks & treats party" for kids. I mean come on. I already have enough kids treats and jammies to keep us busy for weeks. Instead, we went for a spooky baby shower with a few fun surprises thrown in. Our oldest wanted to do something fun so she decided to have a painting party with us. She chose pumpkins as her themes, but I took a different approach, with a small library theme. Now, please be advised that my approach is not for the faint of heart. You do not want to make your centerpiece for the party as it may just scare your guests. For this, I was very inspired by our local library... so I took a few books and brought in the children. If you would like to create your own library theme for a small party or shower, I have some fun ideas. First off, I gathered together c9d1549cdd

Free Rubies Get your Starter Pack Traditionally we offered our starter packs for free in the hope that it would encourage you to use our services. We have since discontinued this offer as it was an invitation to ask us for money which we feel is dishonest. However we have now decided to continue offering our Starter Pack for free, which will contain 10 free rubies and can be purchased from the 'Shop' and should be more than sufficient for you to make a start. Of course if you require more rubies then you can purchase them from the 'Shop' and all sales are final. Note that we advise that you add them to your collection using our 'collect' command before selling them. We apologise to those customers who were previously offered our starter packs for free. We continue to apologise for any inconvenience caused by this change. Transfers and backing accounts are only required if you wish to transfer rubies from your account to your Backing account. This is a useful feature as you can use your Backing account as an e-wallet to sell your rubies. Anchor account Please note that the Anchor account is a payment platform but is a separate service to backing accounts. Here we offer more flexibility by allowing you to gift rubies between one another, hold the rubies in escrow until the owner agrees to release them, purchase rubies as required and back rubies with other currencies. To create a new Anchor account just login and select the 'Anchor account' icon in the top right hand corner of your account. The Anchor account is backed entirely by funds held in one other Stripe account, meaning that it is the same as a standard Stripe account with the difference that funds are automatically escrowed rather than in Redis. This means that you retain complete control of your funds and funds cannot be sent out from your Anchor account without your approval. You remain responsible for the risk for your funds. You may find some pages on this site to be hard to read due to the Anchor account design. We make the backend available to developers and will soon be making sure that the front end is optimised for everyone but in the mean time don't worry too much if the content looks less than polished to you. Backup We offer our backing accounts to allow you to use your Rubies as credit/debit cards and "lend"
