Q: Compare Two Lists, Get Every Changes I have 2 Lists. Both have ID in common. So the items in the lists might be duplicates. After compare list 1 items with list 2. Need to compare it, and remove items in list 2 that do not exist in list 1. I also need to get every changes, that list 2 has added or removed from list 1. The list 1 is changeable, it means that the user can change the content of the list. List 1 Id | Name 5 | Jhon Doe 6 | Jack Doe 7 | Jhon Doe List 2 Id | Name 9 | Jack Doe 6 | Sam Doe 8 | Jhon Doe 7 | Doe In the code below I have just tried to remove every items from list 2, that do not exists in list 1. But the problem is that I don't know how to compare list 1 items with list 2.

```
List list1 = new List(); List list2 = new List(); list1.Add("5"); list1.Add("6"); list1.Add("7"); list2.Add("9"); list2.Add("6"); list2.Add("8"); if (list1.Distinct().Count() != list2.Distinct().Count()) list2.RemoveAll(list1);
```

Expected result should be like below. List 2 Id | Name 6 | Jack Doe 8 | Jhon Doe 7 | Doe

A: So you can use a little linq magic (you get a set of all unique items in a list)

```
var result = list1.Zip(list2, (x, y) => x.Select(z => z.Name)).Where(x => !list1.Any(z => x.Any(y => y.Name == z.Name)));
```

This basically produces an array of items from list1 mapped to the original

items in list2. The Where clause keeps the unique items which are in list2. If you remove that you'll get all the items
