I am building a series of landing pages using VueJS with Bootstrap and Vuetify. In my methods I am calling an API that returns objects of a form like this, the first attribute of each object being the category_name. The desired result of my overall function is to paginate the array of objects and to group the returned objects into categories. Problem: the objects are returned in the wrong order. I need to use the category_name attribute (I think this is the "key" I am looking for) so that I can properly sort the array by the category_name attribute and then group the object by the category_name attribute in order to paginate the objects. Here is my current method (I have removed the irrelevant parts for brevity): export default { methods: { loadRoom(id) { const request = axios.get(`.then((response) => { return response.data; }) .catch((error) => { console.log(error); }); }, I am currently
