
Inurl View Index Shtml Motel Rooms 11

the jsonignore attribute on this property tells the fieldbuilder to not serialize it to the index as a field. this is a great way to create client-side calculated properties you can use as helpers in your application. in this case, the smokingallowed property reflects whether any room in the rooms collection allows smoking. if all are false, it indicates that the entire hotel does not allow smoking. this example is built around the simple ipublicproperty interface, defined by the base class basepublicproperty. one of the most useful features of this class is the getsortproperty() method, which lets the property class tell the static property resolver which field it should return (in alphabetical order) in a json serialization. for example, this little property: the tudor hotel, in the town centre, glasgow, is also a charming place to stay with friendly reception staff. rooms have private bathroom and come with a kitchenette. best of all, some of these have pleasant views across the river clyde and glasgow's finest views. the rooms at the cambridge hotel are spacious and are located in a purpose built 18th-century house. the hotel is located in northfield - and with a restaurant and bar, the anglican chaplaincy coffee house, a lovely garden and a two minute walk from the train station, it is a perfect base for the day out with friends or for city breaks. this beautiful hotel is housed in the historical premises, freya's, and has a charming garden. its rooms are comfortable and well equipped. there is free wifi in the rooms and breakfast can be served either in your room or in the wonderful village location.

Inurl View Index Shtml Motel Rooms 11

after upgrading to the marita deluxe guesthouse we've had a fantastic 10 days, the rooms and the facilities are great. after a couple of years of running a b&b i decided to start a guesthouse. i want to make my guesthouse as good as possible and make it a.. view more view and compare the latest hotel deals from the uk's biggest hotel deals site with our nifty chart tool.. a tripadvisor member writes: "we stayed two nights at the fife place hotel. which room should i get?. this is a 2 star rated hotel and there are just 8 rooms. the room was clean and had everything we needed and the bed was comfortable. this template is used when the inurl index.shtml is a category. the only difference between this template and the other two is that we call the category, hotel.properties.txt. this means we are using the hotel property. when the inurl index.shtml is a hotel, we use this template. the only difference is that the file name is inurl/view/index.shtml. also, for properties, we use the code that is already defined in the hotel property.txt file. this means we are using the hotel property. this template is used when the inurl index.shtml is a property. the only difference between this template and the other two is that we call the property, hotel.properties.txt. this means we are using the hotel property. inurl view index.shtml motel rooms 11 this template is used when the inurl index.shtml is a category. the only difference between this template and the other two is that we call the category, hotel.properties.txt. this means we are using the hotel property.
