Police say they are aware of ongoing problems relating to anti-social behaviour in the town, and are seeing an increase in street drinking and incidents of antisocial behaviour in the town. Davyhulme has become a popular destination for holidaymakers and tourists. There are also concerns about over-capacity at night-time venues and incidents of public drunkenness. Several people have been hit by stray bullets in the town, and there are concerns about possible gang-related incidents. Police said incidents of crime, disorder and anti-social behaviour in the town are having a significant impact on residents' quality of life, with problems escalating in recent weeks. Image caption Police have been keeping an eye on the town's pubs and clubs for anti-social behaviour Superintendent Karen Livingston, from Greater Manchester Police's Public Protection Unit, said: "What we are seeing is an increase in crime and anti-social behaviour in Davyhulme. "We are seeing an increase in street drinking and targeted criminal damage, as well as people openly urinating. "What we are seeing, in particular, is in the town centre and around the various pubs and clubs where there is a significant over-capacity with people being drunk and walking around." Consistent and free.Coccidioidomycosis is a soil-borne fungal disease that is endemic to the southwestern USA. With the central tenet of skin invasion, the fungus disseminates through the body, inducing immunopathology in multiple organ systems. Despite the prevalence of the disease, coccidioidomycosis has often been considered a disease of the past, particularly

among the adolescent and young adult populations. The clinical presentations are diverse, and include a prolonged latent phase, a variety of pulmonary manifestations, and cutaneous lesions. The two most common forms of coccidioidal disease are symptomatic pulmonary infection and an indolent chronic pulmonary infection, often asymptomatic, in the form of coccidioidomycosis \[[@B1],[@B2]\]. Recently, however, a more aggressive form of the disease has emerged in the form of disseminated coccidioidomycosis. Disseminated coccidioidomycosis is generally thought to be part of the spectrum of disease described as "coccidioidal syndrome (CS)" \[[@B3]\]. Maternally acquired CS is an illness that is characterized by fever and skin lesions in young children \[[@B4]\], or other immunocompromised subjects. These manifestations may be accompanied by an acute pulmonary infection, with or without respiratory compromise, or a prolonged skin infection, with or without organ involvement, including the central nervous system (CNS). In contrast to CS, a diagnosis of disseminated coccidioidomycosis in an immunocompetent host 04aeff104c
