Cracking Adobe Photoshop is not as straightforward as installing it. It requires a few steps to bypass the security measures that are in place. First, you must obtain a cracked version of the software from a trusted source. Once you have downloaded the cracked version, you need to disable all security measures, such as antivirus and firewall protection. After this, you must open the crack file and follow the instructions on how to patch the software. Once the patching process is complete, the software is cracked and ready to use.

This is a classic example of a good idea that is poorly executed. The new version has a new layout for color and black and white. There is also a color-temperature adjustment feature. You can see it in the selected view when clicking on a color sample. It's exactly what you would expect, except for one major problem. It works well, but it's not enabled as the default. The new way to make any adjustments is to select the eyedropper tool and click to select a color. Now you can enter the RGB value for that color into an Empty Shape window by clicking on the color sample with the eyedropper. You will then have to click on the color sample's name to enter the hex value. It's not intuitive. You could just make the adjustments with the eyedropper. When you make a correction, the eyedropper disappears and the artwork's colors change. Another problem was I couldn't make any adjustments on the color screen. The values would not budge and I couldn't click on the eyedropper tool anywhere else on the screen. Last but not least, the text adjustment aspect of the chart is also clunky. I could not make any changes with the eyedropper. A new feature of Photoshop Elements 2021 is the ability to add photos into a design with any background color with each photo showing its true transparency. In a design document or PSD file, create a shape fill and then select the color you want to use as the fill. You can then add individual photos to the shape. As always with the Elements program, it's easy to modify the photo that way it doesn't stand out as too much.
